Subject: Haskell Lake meeting notes, 09 May 2017

All: I attached a summary of our conversation yesterday. Main topic was the data model (visualization tool), including its deficiencies, the possibility of Tribal funding to support revisions, and conditions for release of the model to WDNR to support siting of new monitoring wells. Dee and Kristen summarized their objections to the current model iteration and plainly stated their misgivings on releasing the current model to WDNR. Since WDNR has stated a need to examine the model prior to reviewing well installation recommendations put forward jointly by LDF and EPA, we seem to have come to an impasse, pending model revisions.

There have been discussions of disclaimer language between EPA's Erik Olson and LDF's Richard DuBey. If this disclaimer proves workable, it may offer a way forward by limiting the credibility of the current model to the immediate purpose. Needed revisions could then be taken up when data from the new wells is incorporated. Since the chance to use WDNR funding is not open-ended, I suggest both parties consult again with leadership and then again take up the question of when and how the needed well installations can be expedited. Thanks again for your efforts.

Vr,
